

What is a Child Care Assessment

- 
-
- **A Child Care Assessment is a discussion between the worker and the parent to determine how many child care hours the parent needs to participate in their approved activity.**

Why do we do the Child Care Assessment?

- We do the assessment to ensure that we **collect all the required information** needed in order to enter in a child care authorization.
- What does the parent need for childcare for them to participate in their approved activity.

Think, do the hours requested make sense to what was verified
