Different benefit programs may code educational aid differently.

- This means that if a worker is running eligibility for Child Care and BadgerCare (or another program), the same educational aid may need to be coded and entered twice; once using the Child Care coding system and again using other program coding procedures.

What about Child Care cases

CWW will not calculate what portion of private educational aid wasn't used for books or tuition.

Worker needs to Subtract any amount used for books and tuition manually from the total amount.

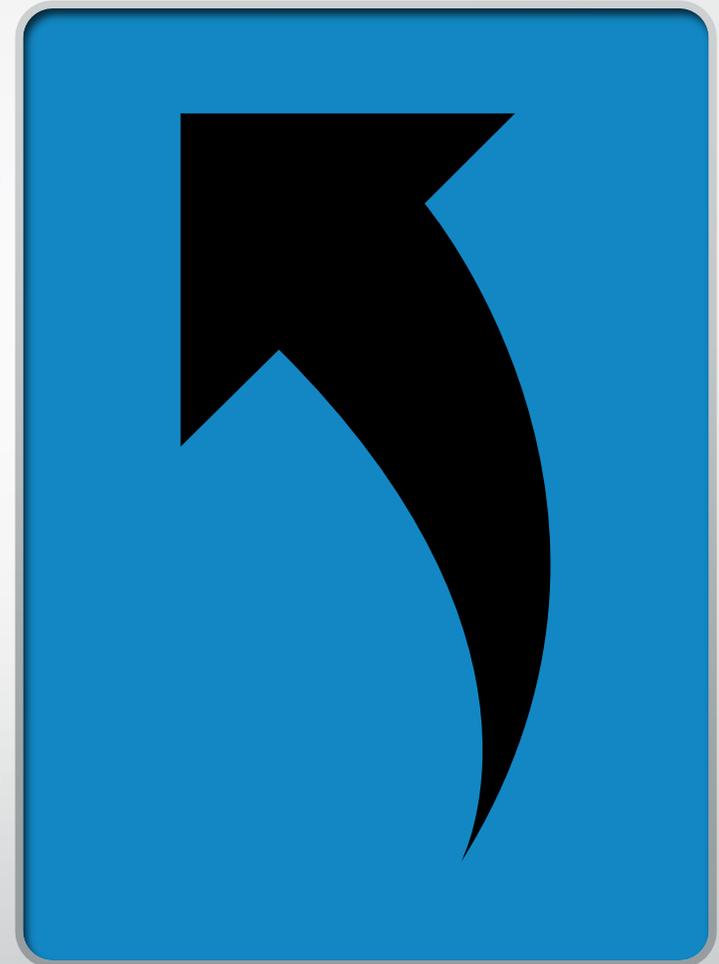

Enter only the final calculated amount in CWW on the Educational Aid page.

What about the Child Care Budget

This code is used to code educational aid
that counts on the Child Care budget:

GR-Grants/Scholarships

- use for private grants/scholarships not used for Tuition/books---Enter the NET amount

What to do for BadgerCare cases

BadgerCare cases do count federal and state grants as income and will use the difference in their budget when you enter amounts used for tuition separately.

Since Child Care uses the code **GR** please be aware that Child Care will count the Full gross into the child care budget

For BadgerCare cases may need use other codes such as **PE** so that child care does not budget income incorrectly

REMINDERS

- CHECK THE BUDGET
- USE THE CORRECT CODES
- ENTER THE NET AMOUNT- CODE GR
- MAY NEED TO ENTER IN OTHER CODE FOR BADGERCARE
